

***Thrips razanii***

Family : Thripinae  
Genus : *Thrips*  
Species : *Thrips razanii*

*Thrips razanii* is a new discovery for Peninsular Malaysia. This new species is named in recognition of the support provided by the former Director-General of the Forestry Department of Peninsular Malaysia (FDPM), The Honourable Dato' Razani Ujang in organising series of forest biodiversity scientific expeditions in Peninsular Malaysia. *Thrips razanii* was found in Perak during Pulau Pangkor Forest Biodiversity Scientific Expedition. It is one of the most important pollinators for tropical and subtropical tree species.
